

AinslieAPI.Controllers.Products
Controller.PriceList

AinslieAPI.Helpers.Cache
DataHelper.RefreshPriceappProducts

AinslieAPI.Services.Internal
ApiService.GetProductPricing

```
graph LR; A["AinslieAPI.Controllers.Products<br/>Controller.PriceList"] --> C["AinslieAPI.Services.Internal<br/>ApiService.GetProductPricing"]; B["AinslieAPI.Helpers.Cache<br/>DataHelper.RefreshPriceappProducts"] --> C;
```

The diagram illustrates a dependency or data flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'AinslieAPI.Controllers.Products' followed by 'Controller.PriceList' on a new line. The bottom box contains 'AinslieAPI.Helpers.Cache' followed by 'DataHelper.RefreshPriceappProducts' on a new line. On the right, there is a gray rectangular box with a black border containing the text 'AinslieAPI.Services.Internal' followed by 'ApiService.GetProductPricing' on a new line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both the controller and the helper depend on or call the service.
