

InternalAPI.Views.MenuItems.  
MenuItemsController.Create

InternalAPI.Views.MenuItems.  
MenuItemsController.DeleteConfirmed

InternalAPI.Views.MenuItems.  
MenuItemsController.Edit

InternalAPI.Views.MenuItems.  
MenuItemsController.Index

```
graph LR; A[InternalAPI.Views.MenuItems.MenuItemsController.Create] --> D[InternalAPI.Views.MenuItems.MenuItemsController.Index]; B[InternalAPI.Views.MenuItems.MenuItemsController.DeleteConfirmed] --> D; C[InternalAPI.Views.MenuItems.MenuItemsController.Edit] --> D;
```

The diagram illustrates a mapping or routing configuration. On the left, there are three white rectangular boxes, each containing a text string representing a source endpoint. These are: 'InternalAPI.Views.MenuItems.MenuItemsController.Create' (top), 'InternalAPI.Views.MenuItems.MenuItemsController.DeleteConfirmed' (middle), and 'InternalAPI.Views.MenuItems.MenuItemsController.Edit' (bottom). On the right, there is a single gray rectangular box containing the text 'InternalAPI.Views.MenuItems.MenuItemsController.Index'. Three blue arrows originate from the right side of each of the three white boxes and point towards the left side of the gray box, indicating that the three source endpoints are mapped to the single destination endpoint.
