

bower

The diagram illustrates the internal structure of the Bower package. It features a large, light-blue rounded rectangle with a dashed border, representing the 'bower' package. Inside this rectangle, at the top center, is the label 'bower'. Below this label is a solid black horizontal bar. Underneath the bar is a row of six light-blue rounded rectangles with solid black borders. The first five rectangles contain the labels 'bower-registry-client', 'bower-logger', 'bower-json', 'bower-endpoint-parser', and 'bower-config' respectively. The sixth rectangle, on the far right, contains the label 'packages'.

bower-registry-client
